Reference letter

BearingPoint is one of the global market leaders in management and information technology consulting.

Our collaboration with EleWise started in 2008, when we worked together on developing extensions for Oracle e-Business Suite for the Wimm-Bill-Dann company, which is currently part of PepsiCo.

Since then, we have worked together in different areas, the main of which being:

- Development of Oracle e-Business Suite extensions
- Design of data warehouses and analytic systems
- Design of integration solutions

Whatever the task, EleWise always demonstrated a very responsible approach and a high quality of the work produced.

Needless to say, the working process is always perfectly organized; and as a customer we are very happy with how the customer communication is managed.

EleWise helped us in numerous projects, among which I would especially like to mention the solutions for McDonalds, Vimpelcom (VIP: NASDAQ), OMK (United Metallurgical Company), Severstal (SVST: LSE) and Wimm-Bill-Dann (PepsiCo group).

We are very grateful for the successful work of EleWise and hope to continue our collaboration, totally relying on their experience and talent.
